3	NEWS 1 - Metallica gambles on vinyl
----------	--

Metallica has purchased a majority stake in Furnace Records, one of the biggest and most important vinyl records companies in the U.S. Why you might ask?

Well, they are selling so many records of late, they are unable to keep up with demand.

You may recall last week, I quoted some numbers indicating that vinyl sales had exceeded CD sales in 2022 by over 70%... well, this new investment by Metallica adds to the mix... so, what's old is definitely new again!

STINGER**NEWS 2 - myGov scams on the increase**

Services Australia are the latest targets for scammers in Australia where text messages are being sent to those with myGov accounts. Scammers are claiming that changes have been made to the security information on user's accounts and that action is required to ensure payments and benefits are not affected. As usual there is a link in the message which directs the clickers to a captive portal, where the sole purpose is to trick you into divulging your personal information.

Cue broken record... never click on a link in a message. Always go to the verified and correct website to see what's going on or call on the published numbers to clarify and verify any written correspondence.

ACCC advice

- Do not click on any links or open attachments from texts claiming to be from your bank or another trusted organisation and asking you to update or verify your details – just press delete;
- Do an internet search for any references to a similar scam;
- Look for the secure symbol on the website to know if it's secure;
- Never provide your personal, credit card or online account details if you receive a call claiming to be from your bank or any other organisation. Instead, call your bank to check;
- If you think you have provided your account details to a scammer, contact your bank or financial institution immediately; and
- Report scams to the ACCC via the report a scam page to help spread the word.

STINGER**NEWS 3 - Is TikTok safe?**

TikTok has come under fire for security breaches and data leakages and as a result has been banned for use on government phones in some countries including the US, UK with NZ and Aus to follow suit.

If you believe what you hear in the media though, the Australian General Manager of TikTok has come out to say:

TikTok doesn't operate in China and user data is held in the US and Singapore, with strict cyber security measures in place to ensure safety and privacy. So, if you're an Aussie user of the app, you can rest easy knowing that your data is secure and out of reach of any other country... well except the US and Singapore.

STINGER**NEWS 4 - From the Innovation Hub - Smart Pillows**

Sleep! As we've touched on in previous episodes, over 40% of our population suffer from some kind of sleep problem with around ¼ of these people chronically. You've heard of sleep apps with snoring and cough detection, well they only go so far... Enter the new innovative smart pillow. What does it do?

Pillows have a much bigger canvas to play with and so open the door to many options not possible from external non-contact smart devices. Broadly speaking a smart pillow can do all this and more including tracking head movements and snoring counter-measures by adjusting the head's position when snoring is detected. This can easily be achieved by inflating and deflating small independent airbags. Pillows can include haptics (vibration) and/or light signals to alert people with impairments of any alarms or warnings that would otherwise go undetected. Smart Pillows, coming to store near you...

What is it?...

It's your library in an App

You can borrow eBooks, eAudioBooks and eMagazines free from your public library

What do you need?

- You need to be a member of a public library (so a member card and pin code)
- Install the app from Appstore or Playstore or Amazon store for Kindle
- You can also go to the website for your library e.g. gosnells.borrowbox.com
Best to google "library name" borrowbox and go from there
- Login and choose your local library
- Joining is possible online (since Covid) but you may need to attend to get your physical card

Then What?

- Browse, search, preview and borrow
- Items are automatically returned after the loan period expires
- There are limits to the number of item you can borrow in each category
- There may be a wait as items are treated like physical copies and licensed accordingly
- You can reserve, wish list, be notified of new releases and more

There's more

There are also other apps including Libby/Overdrive, Hoopla and Kanopy - explore!

CD player turns 40

The advent of the 4.7" shiny scratch resistant, plastic coated aluminium digital compact disc, was a game-changer for the music industry. CDs allowed for higher quality sound reproduction and made it easier to store and organise music collections. Consumers no longer had to worry about skipping records or winding tapes. <https://www.usatoday.com/story/graphics/2023/03/18/cd-players-40-years-compact-disc/11307793002/>

Pentium First Shipped

Intel ships the first Pentium processors, debuting with speeds of 60 and 66 (mega) MHz. With 3.1 million transistors and 4 GB of addressable memory, it was a significant upgrade from the 80486 line of processors. Today we have typical speeds of 3 (giga) GHz just quietly 😊

How this for a totally absurd retirement plan ... (that we would seriously consider).. they are now accepting reservations for a three-year world cruise. The trip will cover over 130,000 miles and visit 375 ports across 135 countries and seven continents.

According to a press release, the cruise ship has 400 cabins and room for up to 1,074 passengers.

With prices starting at \$45K a year buying into the cruise can be cheaper than renting

Tenants will also get to take advantage of additional tax benefits when working as international residents aboard the ship.

Each stop of the ship's itinerary will include multiple days in port. The three-year voyage will start in Istanbul on November 1, 2023, with pickups in Barcelona and Miami.

-----------	-------------------------------------

Theme	Solitaire Game Music
--------------	-----------------------------

A tabletop game of patience where you play with yourself out in public 😊 usually with cards but there are also versions with dominoes or mahjong tiles. Dating back to the late 1700s it was known as paitence-spiel. The most popular card version is Klondike which Microsoft released in the 1990s. Other versions include Spider, Yukon and FreeCell.

Play is simple. You need to use the desk of cards by playing them in a layout and sorting them according to specific rules.
